Work Repairation Technician (f/m)

We are looking for an experienced work preparation technician within the department "Ground Segment and Operations in Bremen. The job is within the Assembly, Integration and Test (AIT) team of the Orion European Space Module (ESM) project. This has an overall responsibility for AIT and Ground Segment Equipment.

Your responsibilities:

- Working on the typical AIT tasks
- Functioning as a focal point for the ESM industrialization team, design office, integration quality, and the configuration management
- Creating & updating the integration work orders required for ESM
- Chasing updates with QA and the on-floor integration activities on a daily basis
- Coordinating the delivery of hardware to the cleanroom from the storage area
- Monitoring the ESM flight hardware stock
- Supporting AIT engineering with integration methods, logic and sequence
- Supporting the design engineering within the Orion ESM project and the AIT engineering with change implementation
- Continuously develop and improve the work order process

Your profile:

- Hold a master degree in electrical engineering, aeronautics or equivalent studies
- At least 2 years work experience in engineering
- Experience in manned space or aerospace projects
- Experience in design to production/ engineering / testing
- Work experience in MS Office, MS SharePoint and SAP
- Fluent English and good German language skills
- Good communication and analytical skills
- Open minded, strong personality and eager to work in the next mission to the moon

Location: Bremen

What to expect from us:

- A permanent contract of employment
- Fair and performance-linked wages
- Additional social benefits, vacation and Christmas bonus
- 30 days of vacation p.a.
- Cordial cooperation in a great team with personal contacts

We are looking forward to your application. Please refer to the reference number of the job description. Thank you.

Please send your application to bewerber@scengineering.de
